Doctor Foster is now subject to arrest. Divide into two squadrons and initiate pursuit
The accurate location of the suspect and hostage cannot be established, but we presume they're on the 8th floor. Squadron A will form a front line
Squadron B will search for Doctor Foster. His exact location is unknown, but he is likely to be running through the hospital underground passage

This is Squadron B heading down to Basement 1.
He isn't a big threat, but he does possess a gun. Please be careful.
